**DO NOT USE THE CHART ON YOUR SCREEN
PRINT THIS OUT!**

After printing the chart, measure your watch by fitting one of the Millimeter bars between the lug ends of your watch. The lug ends are the part of the watch the band attaches to.

If a band is attached to your watch, fold one side of your band against the watch, so the lugs are visible for measuring.

**Now you know the size you need
to either find it on the web site or
call us and we will gladly help you.**
